An overview

Professionals with an EBU MBA degree are able to enhance their personal portfolio. The options of an online education fit well into an already busy schedule. In addition, the best business degrees are lived or shared experiences. The real-world experience presented by serious academics begin in year one as you build your general management knowledge and gain valuable experience from colleagues and Professors. Dive into complex managerial issues with this series of selective courses and gain insight into the perspectives of a senior manager or leader while understanding the larger context of management. Develop managerial skills including management in a global context.

The courses presented here offer a menu of choices in each required discipline, calibrated to your skills, experience, and future goals. As an applied branch of Business Management, the Master of Business Administration offers specializations in Financial Markets and Securities, Financial Technology and Blockchain, and Data Science and Artificial Intelligence. Business institutions constantly seek MBA trained personnel and these courses are designed to guarantee that you meet the demands. The Master of Business Administration is a one-year course-work degree program, followed by a Thesis for a total completion time of 6 months. It is specifically designed to prepare graduates as the next generation of Managers.
